

GSE92415 | Exploratory discovery

65 paired patients | Candidate6 assembled

Fixed analysis specification

Genes, weights, aliases and primary model

GSE23597 | Designated validation

32 paired patients | Clinical-response criterion not met

GSE73661 | Endoscopic healing

IFX: positive association | VDZ: imprecise positive estimates

GSE282122 | Longitudinal single-cell analysis

Composition and CT-colonocyte expression analysed separately

Recovery depth and transcriptional scope

Non-IBD controls and three non-overlapping CT programs

Focused CT-colonocyte re-expression with incomplete bulk normalization
